

TANZEEL HUSSAIN

Ethical Hacker

Cybersecurity Student

CONTACT

- tanzeelhussain38529@gmail.com
- Islamabad, Pakistan
- tanzeel0hussain.github.io
- linkedin.com/in/tanzeel-hussain0
- github.com/Tanzeel0Hussain

SECURITY TOOLS

- Kali Linux
- Metasploit Framework
- Burp Suite
- Wireshark
- Nmap / Zenmap
- Scapy (Python)

PROGRAMMING

- Python (Security Scripting)
- C++ (Embedded / ESP32)
- JavaScript, HTML & CSS
- Java
- Bash

COMPETENCIES

- Penetration Testing
- Network Recon & Scanning
- Packet & Traffic Analysis
- Vulnerability Assessment
- Log Analysis
- Zero Trust Architecture
- IoT Security
- OSINT Techniques

TOOLS & PLATFORMS

- Linux CLI
- Git & GitHub
- Docker
- Raspberry Pi & ESP32

PROFILE

Motivated final-year BS Computer Science student specialising in cybersecurity, ethical hacking and network security. Hands-on experience building security tools in Python and C++ — port scanners, packet sniffers, log analysers and ESP32-based wireless monitors. Currently developing a Zero Trust Architecture as my Final Year Project. Seeking an internship to apply practical skills in penetration testing, network security and security analysis.

EDUCATION

BS Computer Science (BSCS)

Spring 2023 – Expected 2027

Iqra University, Islamabad · Final Year · Focus: Cybersecurity & Network Security

- **Final Year Project:** Zero Trust Architecture for IoT — identity-based access control, micro-segmentation, device verification, message authentication and replay protection (ESP32 / ESP-NOW, Raspberry Pi).
- **Key Courses:** Data Communication & Networks, Operating Systems, Digital Forensics, Web Security, Database Systems, Data Structures & Algorithms.

SECURITY PROJECTS

Cybersecurity Tools Suite (15+ Tools)

Python · Scapy · Sockets · Tkinter

- Built a port scanner (CLI + GUI), Wireshark-style packet sniffer and vulnerability scanner.
- Directory brute-forcer, login brute-force simulator, password policy auditor and strength checker.

PacketSageX — Network Forensics Platform

Python · PCAP · Nmap

- PCAP and traffic analysis with protocol classification, Nmap result parsing and forensic reporting.

Advanced Network Mapper

Python · Network Recon

- Nmap-style host discovery, port enumeration and service fingerprinting written from scratch.

Wi-Fi Phantom & ESP32 Wireless Security Lab

C++ · ESP32 · PlatformIO

- Defensive Wi-Fi monitors: passive scanning, deauth/disassociation detection, RSSI analysis, alerts and a local dashboard.

Log Analyzer & AI Cyber Threat Analyzer

Python · JavaScript

- Detects anomalies, brute-force patterns and unauthorised access in logs; scores risk and suggests remediations.

CERTIFICATIONS & TRAINING

Ethical Hacker

CTF Competitions & Pentest Labs
Self-directed: OWASP Top 10, OSINT, Bug Bounty

LEADERSHIP & ATTRIBUTES

- **Teaching Assistant** — Database Systems & Operating Systems, Iqra University.
- **Class Representative** — coordinating between faculty and students.
- Detail-oriented, with clear documentation skills for vulnerability reports and technical findings.
