PROFILE

I'm a final-year Computer Science student at Iqra University, Islamabad, specialising in network security, Zero Trust architecture and IoT security, with hands-on experience building defensive tools in Python, C++ and Rust — from packet and log analysis to authenticated communication for embedded devices.

EXPERIENCE & LEADERSHIP

Final Year Project — Zero Trust Architecture for IoT

Final year

Iqra University, Islamabad

Designing secure ESP32/ESP-NOW communication with Raspberry Pi integration: device verification, message authentication and replay protection so no device is trusted by default.

Teaching Assistant — Database Systems & Operating Systems

Iqra University

Department of Computer Science

Supporting students in labs and coursework, explaining core database and OS concepts and helping with assignments.

Class Representative

Iqra University

BS Computer Science

Coordinating between faculty and students on course schedules, announcements and academic concerns.

SELECTED WORK

PacketSageX

Network traffic intelligence and forensics platform for analysing captures and scan results.

Python · PCAP · Nmap · Forensics

RangeLink32

Smart ESP32 Wi-Fi extender and managed gateway with a responsive local admin dashboard.

C++ · ESP32 · Networking · IoT

TECHNICAL SKILLS

Security	Wireshark · Nmap · Kali Linux · Metasploit · SIEM · Zero Trust · IoT Security · Traffic Analysis
Languages	Python · C++ · Rust · JavaScript · Java · Kotlin · Dart · Bash
Systems & Platforms	Linux · ESP32 · Raspberry Pi · FastAPI · Flask · Flutter · SQLite · Git & CI

EDUCATION & CERTIFICATIONS

BS Computer Science

Feb 2023 – Jan 2027

Iqra University, Islamabad Campus

Coursework: Operating Systems, Database Systems, Data Communication & Networks, Software-Defined Networking, Artificial Intelligence, Compiler Construction, Software Engineering, Parallel & Distributed Computing.

Final Year Project: Zero Trust Architecture for IoT.
